

B.Tech (Food Tech) Exam Study Plan

3rd Year, 2nd Semester | Target Date: June 15th

This study plan is structured to cover all 9 subjects over 33 days, allowing for deep dives into technical subjects and a final 10-day intensive revision window.

Study Schedule

Timeline	Subject / Course	Key Focus Areas
May 13 - 15	Food Packaging Technology (FDPT 313)	Materials (Paper, Glass, Metal, Plastics), Permeability, Aseptic/MAP/Active Packaging.
May 16 - 18	Processing of Fish & Marine Products (FDPT 314)	Composition, Spoilage, Preservation (Freezing, Canning), Surimi, Value-added products.
May 19 - 21	Instrumentation & Process Control (FDPE 323)	Measurement of Temp/Pressure, Control systems, Instrument characteristics.
May 22 - 24	Entrepreneurship Development (FDBM 344)	Characteristics, Globalization, Feasibility studies, Government incentives.
May 25 - 26	Sensory Evaluation (FDPT 315)	Senses & Perception, Discrimination tests (Triangle/Paired), Descriptive analysis.
May 27 - 28	Food Additives & Preservatives (FSQA 333)	Toxicology, Safety, Colors, Stabilizers, Thickening agents.
May 29 - 30	Food Plant Sanitation (FSQA 334)	GMP, Personal hygiene, Pest control, Sanitary design.
May 31 - June 1	Project Preparation & Management (FDBM 343)	Project planning, Execution, Resource management.
June 2 - 4	Student READY - Research Project (FDPO 352)	Finalize report documentation, review investigation results & library work.
June 5 - 10	Comprehensive Revision Phase 1	Solve previous year questions, focus on weak subjects (e.g., Engineering & Packaging).
June 11 - 14	Final Mock Tests & Rapid Review	Flashcards for additives, diagrams for instrumentation, and quick-read summaries.

Strategic Tip: Prioritize *Food Packaging* and *Instrumentation* early, as these involve more technical diagrams and formulas. Use the final 4 days for rapid recall and mock papers.
